WE ARE HIRING!

Environmental Geospatial and UAV officer

SAERI is seeking a highly motivated and versatile **Environmental Geospatial and UAV officer** to join our dynamic research team in the Falkland Islands—one of the world's most remarkable wildlife destinations. This is an exceptional opportunity to launch or advance your GIS career while contributing to impactful environmental research.

The ideal candidate will bring the following:

- Strong programming skills (e.g., Python)
- Solid GIS experience and a degree in GIS, environmental science, or a related field
- Robust data management skills, with bonus points for experience in webGIS or CKAN
- UAV experience, including surveys —or a willingness to train (UAV training provided)
- The ability to work independently, think creatively, troubleshoot effectively, and communicate clearly

What We Offer

- A 1-year position with the potential to extend
 - Exceptional professional development opportunities
 - The chance to work in a supportive, collaborative environment on projects that make a real difference
- A rare opportunity to live and work in the stunning natural environment of the Falkland Islands

If you're excited about combining GIS, coding, UAVs, and conservation research in a place like no other, we'd love to hear from you.
